

Interconnected, Surface-Applied Preformed Thermoplastic Crosswalks and Streetscape Surfaces for Asphalt and Concrete

TrafficPatterns® provides a cost-effective, traditional look and alternative to the use of brick and stone pavers because the material is surface applied and virtually maintenance free. The pattern and color combinations of the interconnected sheets allow designers the flexibility to create the ideal crosswalk or surface pattern that complements the overall streetscape design.

PERFORMANCE-BASED FEATURES AND BENEFITS

- Engineered as heavy-duty intersection grade pavement marking material with enhanced durability
- 125-mil; interconnected sheets of material
- High skid/slip resistant for safety. As material wears, new anti-skid elements are exposed.
- Can be applied on newly-stamped asphalt as soon as the road surface cools and sets
- Does not alter substrate
- Does not require stamping templates or grids
- Open to traffic minutes after application
- ADA compliant - Pedestrian and wheelchair friendly surface
- Eliminates the maintenance and safety concerns of loose pavers
- All preformed thermoplastic materials are made at Ennis-Flint's manufacturing facility which is ISO 9001:2015 certified for design, development and manufacturing of preformed thermoplastic. Quality, value and long-term performance are built into the marking. Anti-skid elements are added at time of manufacturing for optimized application at the jobsite.

TrafficPatterns® does not require expensive capital equipment, customized tools, templates or grids for application. The 2'x2' sheets of interconnected material are easily lifted and positioned onto an asphalt or concrete surface. Border segments can be added for design variability. Application is simple with a large infrared heater or a propane heat torch.

STANDARD PATTERNS (2'x2' Sheets)

STANDARD BORDERS

All designs patented.

Premium colors are subject to upcharge and may require a minimum purchase.

TrafficScapes®

Surface Systems for Enhanced Safety

CROSSWALKS • MEDIANS • ISLANDS • ROUNDABOUTS • ENTRYWAYS • LOGOS

TrafficScapes® is a portfolio of preformed thermoplastic pavement marking materials engineered for durability, safety, and aesthetics for the streetscape and traffic calming market. Each product offers its own unique application and performance approach to streetscape projects where shared roadway safety and aesthetic appeal need to work in conjunction.
