TrafficPatternsXD® preformed thermoplastic is an extremely durable material that incorporates a unique aggregate-reinforced formula with enhanced wear resistance. The result is a traffic-tough crosswalk that provides traditional bricklike aesthetics built to last.

**PERFORMANCE-BASED FEATURES AND BENEFITS**
- Designed for extreme use and wear in high-traffic crosswalks and traffic calming surfaces
- Engineered for a robust application system and enhanced durability at 150 mils
- Enhanced performance in all climates
- Applied to high-quality, stable asphalt with minimal substrate impact
- Fast installation and minimal traffic downtime
- High skid/slip resistant for safety – as material wears, new anti-skid elements are exposed
- ADA compliant – pedestrian and wheelchair friendly surface
- Eliminates the maintenance and safety concerns of loose pavers
- Made at Ennis-Flint’s manufacturing facility which is ISO 9001:2015 certified for the design, development and manufacturing of preformed thermoplastic
- Markings designed for quality, value, and long-term performance
- Anti-skid elements added at time of manufacturing for optimized application at the jobsite

TrafficPatternsXD thermoplastic material is installed by a network of certified applicators so you can be confident that your design intentions will manifest on the job site. The 2 ft. x 2 ft. sheets of material are positioned on the non-stamped, prepared asphalt surface. The material is heated to allow proper embedment of the anti-skid elements. A specialized grid gently stamps a pattern into the material and just into the top layer of the asphalt.

TrafficScapes® preformed thermoplastic pavement marking materials portfolio is engineered for durability, safety, and aesthetics for the streetscape and traffic calming market. Each product offers its own unique application and performance approach to streetscape projects where shared roadway safety and aesthetic appeal need to work in conjunction.

When used on public roadways and private properties open to public travel, decorative crosswalks require proper demarcation with white linear boundaries according to the Manual on Uniform Traffic Control Devices (MUTCD).
