

TrafficScapes®

Surface Systems for Enhanced Safety

The TrafficScapes® line includes six products: TrafficPatterns®, TrafficPatternsXD®, TrafficPatternsGF®, TrafficPatternsLT®, DuraTherm® and DecoMark®.

Each product is made of durable preformed thermoplastic material and offers its own unique application and performance approach to streetscape projects where shared roadway safety and aesthetic appeal need to work in conjunction.

IMPRESSED

TrafficPatternsXD® incorporates a unique aggregate reinforced formula with unprecedented wear resistance. A specialized grid gently stamps a pattern into the material and just into the top layer of the asphalt. Providing traditional brick-like aesthetics built to last.

OVERLAY

TrafficPatternsLT® provides a more durable and skid-resistant surface than typical epoxy coatings or paint. It is simply applied over newly-stamped asphalt or used as a refurbishment where previous coatings have worn away. This eliminates the need to repaint again and again.

INTERCONNECTED

TrafficPatterns® provides a cost-effective, traditional look and alternative to the use of brick and stone pavers because the material is surface applied and virtually maintenance free. The pattern and color combinations of the interconnected sheets allow designers the flexibility to create the ideal crosswalk or traffic calming pattern that complements the overall streetscape design.

GROUT FREE

TrafficPatternsGF® provides the same cost-effective, traditional look and alternative to the use of brick and stone pavers as our original TrafficPatterns® but with variegated colors and no grout lines. Offered in three color blends with two patterns each.

INLAID

DuraTherm® is inlaid into an imprinted asphalt surface and thermally bonded using specialized infrared heaters. Engineered to lie slightly below the asphalt surface, DuraTherm® is protected from wear, ensuring effective service life while maintaining its attractive contemporary look for years.

SURFACE SIGNS

Maximize traffic guidance, reduce sign clutter, increase brand awareness, enhance community pride, and promote school spirit with durable preformed thermoplastic horizontal surface signage that is engineered to last 6 to 8 times longer than paint. DecoMark® design and color combinations are virtually endless.

TrafficScapes®

by Ennis-Flint

CROSSWALKS • MEDIANS • ISLANDS • ROUNDABOUTS • ENTRYWAYS • LOGOS

TrafficScapes® is a portfolio of preformed thermoplastic pavement marking materials engineered for durability, safety, and aesthetics for the streetscape and traffic calming market designed to:

- Improve traffic safety especially at intersections and multi-use paths
- Enhance visibility for pedestrians, motorists, and cyclists
- Provide design elements that complement a Complete Streets community
- Channel pedestrians across busy commercial parking areas
- Promote and/or revitalize community image
- Attract new business development in livable communities
- Create low-cost median or island effect without the use of raised curbs

Each product offers its own unique application and performance approach to streetscape projects where shared roadway safety and aesthetic appeal need to work in conjunction.

When used on public roadways and private properties open to public travel, decorative crosswalks require proper demarcation with white linear boundaries according to the Manual on Uniform Traffic Control Devices (MUTCD).
