

## SPECIFICATION

### One-Part Sealer for Portland Cement Concrete

1. **USE:** A transparent acrylic primer used to enhance the bond strength between the road or pavement surface and thermoplastic pavement markings.
2. **COMPOSITION:** The sealer shall be a solvent-based liquid composed of modified acrylic resins in a near zero VOC solvent-based system.
3. **PROPERTIES:**

VOC Content:	Less than 10 g/L
Appearance:	Liquid
Color:	Amber
Odor:	Aromatic-like solvent
Density:	0.93 ± 0.03 g/cc
Solubility in water:	None
Flash point:	-18°C (5°F)
4. **APPLICATION:** The sealer shall be capable of being applied to the road surface either by brush, roller, or sprayer. It shall be capable of being applied in a thin, even, uniform coat.
5. **PACKAGING:** The sealer shall be available in 1-gallon and 5-gallon pails. Shelf life shall be twelve (12) months in an unopened container.
